A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word dictionary comes from the Latin 'dictio'('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used; bilingual dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words.

Dictionaries which explain what words mean give a clear definition of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced.

¶ Usually the International Phonetic Alphabet (IPA) is used for this purpose.

A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like 'pajamas', 'bazaar' and 'paradise' entered English from Persian.
